

# Pathology IT: Embracing the Future

Friday 1 October 2010

5 CPD Credits

To be held at The Royal College of Pathologists, 2 Carlton House Terrace, London, SW1Y 5AF  
Provisional programme

How will IT influence the shape of Pathology practice? In the modernization agenda and in the centralization endeavour, IT is central to any successful configuration. Come and learn about what is on the horizon and how it will affect you. What is the role of the National Laboratory Medicine Catalogue, where does it fit in? Go beyond just identifying that we are communicating about the same thing and make it meaningful for our users; find out how pathology harmonisation will help with the future direction for pathology. Understand the importance of cancer datasets. What has happened about GP order communications? When will laboratory to laboratory communications be working and how? What will the Summary Care Record do for a pathologist? What can a pathologist do for the Summary Care Record? Does a Laboratory Information Management System have a future? What is happening about decision support? If no LIMS, where will decision support sit? How can I avoid attending meetings to learn, discover what eLearning can do for you.

All these and more will be answered in this programme. Just look at the faculty!

09.30 Registration & Coffee

**Chair: Dr Ian Bailey**

10.00 Introduction – **Dr Danielle Freedman** (Luton & Dunstable Hospital)

10.10 Cancer Datasets – **Dr Brian Rous** (Peterborough District Hospital)

10.40 Pathology Harmonisation – **Dr Jonathan Berg** (City Hospital, west Midlands)
