Attending Coroner's court can be a daunting experience for trainee pathologists and consultants, particularly as fewer inquests require a pathologist to attend, and pathologists may only be called to attend for more complicated cases. During this webinar we will hear from experienced Coroners, both medical and legal, experienced consultants and a trainee experience of Coroner's court. This webinar will help you understand the purpose and format of a Coroner's inquest, what the Coroner expects from a pathologist, how to give evidence and how to answer questions from other persons in the court.

3 February 2026

11 February 2026

19 February 2026

27 February 2026

The sessions are designed to support trainees in Chemical and Cellular Pathology specialties using the LEPT system in preparation for the ARCP period. This is the first of four standalone refresher sessions offered throughout February. You're welcome to attend any or all—check the calendar for other available dates.

3 February 2026

This webinar will examine recent developments in the diagnosis and management of Gram-negative bloodstream infections, with a focus on the laboratory and clinical impact of rapid diagnostic technologies. Topics will include the epidemiology and burden of disease,

real-world implementation of rapid genotypic and antimicrobial susceptibility testing, and integration into laboratory workflows, antimicrobial stewardship, and patient pathways.

4 February 2026

Calling all Residents! Following some excellent sessions on medical liver disease in 2025, and based on feedback received from delegates, the UK Liver Pathology Group in conjunction with the Royal College of Pathologists are pleased to announce the continuation of our virtual liver pathology bitesize series. Given the variability in exposure to liver pathology during training across the UK, some of the cases discussed will include FRCPath style cases, but also cover entities which pathologists may come across regularly as part of their working practice. There are six webinars which take place during 2026, which this year will be focussing on lesional liver pathology, and will aim to return to medical liver disease in 2027.

4 February 2026

We are delivering a webinar series on 'Managing Lower Respiratory Tract Infections'. This webinar series deals with a set of clinical conditions which are important for their varied clinical presentations, overlapping signs and symptoms and challenges in arriving at a proper diagnosis with imaging and microbiology. The impact that these challenges may have on the management and final outcome in patients is hopefully brought out in the webinar series. This webinar is part 1 of this webinar series that will be exploring Community Acquired Pneumonia & Lower Respiratory Infections.

11 February 2026

Maternal deaths are rare (only 80-100pa across the UK) but their autopsies are not generally done well, due to unfamiliarity. These two lectures present the overarching context of maternal mortality in the UK, cover the major pathologies of Direct & Indirect maternal deaths, and inform on how to perform the autopsies optimally.
