

## Appendix A SNOMED codes

### Topographical codes (T) and morphological codes (M)

Topographical codes are used in SNOMED 2 and SNOMED 3 to indicate the site of lesions and morphological codes (M) are used to indicate the morphological diagnosis. Common topography and morphology codes are given in the second table below, although the list is not exhaustive.

## **SNOMED versions**

SNOMED CT, also known as SNOMED International, is a newer SNOMED system, first introduced in 2002 with multiple updates (it is shown in the 2 right-hand columns) and uses different codes from SNOMED 2 and SNOMED 3 (numerical code only is used for SNOMED CT, rather than T and M codes followed by a number).

Please note that SNOMED 2 and SNOMED 3 are no longer licensed for use.

## **Procedure codes (P)**

Local P codes should be recorded. At present, P codes vary according to the SNOMED system in use in different institutions.
