

Appendix E - Recommended Staging to be collected by Cancer Registries

The National Staging Panel for Cancer Registration recommends that the staging systems recorded by the cancer registries follow the guidance issued by the Royal College of Pathologists and the Cancer Outcomes Services Data set.

It is also important to note that both UICC and AJCC coding systems are updating to v8.0, please refer to the either the Cancer Stats documentary library and then the appropriate staging sheet for your tumour type¹ or refer directly to the TNM Staging Books, for the most recent and accurate stage groupings/combination².

Note: *The change from TNM 7 and TNM 8 take effect from 1st January 2018 unless otherwise stated.*

Note: The use of preferred staging systems (which should be used), is under frequent review and may change in the future:

- * - this staging system is recognised as currently being discussed and new guidance will be available if changes are required
- ** - see Section 1.16 Stage of COSD User Guide v8.0.3 for further advice on how to record Neuroendocrine tumours for COSD
- *** FIGO 2013 was implemented in January 2014
