The joint RCPATH/BDIAP Taster Event 2024, is an exciting opportunity for you to explore pathology and see what the career has to offer. This virtual programme will be delivered with a mixture of specialty-specific sound bite videos from a variety of consultants and trainees (sent to attendees a few days before the meeting), followed by a **live virtual session, which will take place in the evening and last approximately 1.5 hours (via zoom)**. It is free to register.

Date: 30 July 2024

Location: Online via Zoom

One in five deaths are avoidable, yet there is no system in place to investigate these deaths. The Preventable Deaths Tracker is a vigilance platform that provides the first database of all published coroner reports in England and Wales. In this talk, Dr Richards will share insights about the development of the Tracker and the future research as the new 2024 King's Prize Fellow.

Date: 18 September 2024

Location: Zoom

CPD credits: 1

This event will take place at 1:00pm and last approximately 1 hour.

Date: 25 September 2024

Location: Zoom

In this webinar, Dr Copeland will demonstrate how the NPSUM data can be used to inform coronial investigations of drug-related deaths, including the value of considering individual decedent demographics (e.g. age, gender, ethnicity, body mass index) when interpreting toxicology results, and the identification of novel drug-drug interactions which can impact drug toxicity profiles.

Date: 26 September 2024

Location: 6 Alie Street

CPD credits: 6

The Royal College of Pathologists, the lead medical royal college for Medical Examiners, is providing the essential training which will equip you with the knowledge and skills you will need for this important role. The day will include short presentations, small group discussions of case scenarios and the opportunity to share experience.

Date: 10 October 2024

Location: Zoom

CPD credits: 1

In this webinar Dr Hart will discuss the role of various biomarkers to aid the diagnosis of neurological disease and will describe recent advances in the fields of neurodegeneration and neuroinflammation.
