Here, we show you the vital role of pathology during your life.

Conceiving a baby

Newborns

Pathologists study the newborn baby to ensure there are no birth defects or injuries. They also provide insight on treatment options and delivering treatment.

Investigation of conditions affecting babies

Babies

Newborn screening involving pathologists working in genetics

They investigate and offer advice on treatment options, such as in vitro fertilisation.

Investigation of conditions affecting babies

Toddlers

Pathologists, who could be doctors or healthcare scientists, help all of us by

Pathology: at the heart of your health

A journey through your life and how pathologists can help you

What is pathology?
