Technical Training Programme

ONLINE (VIRTUAL) COURSE

November 11-12, 2021

Technical advancements in all sections of Pathology have made it necessary for training of technical staff from basics to modern technology. This is essential for their smooth and efficient functioning in the laboratory, to handle and process patient clinical specimens. This will enable a good and meaningful patient care.

This two day programme is a serious attempt in this direction to reach out to technical staff from both teaching and non teaching institutions so that they are better equipped to handle specimens from the patient.

We have selected senior and experienced faculty and hope that their practical knowledge will benefit many of us.

Dr. Kedar Deodhar (Mumbai)

Dr. Ranganathan Iyer (Hyderabad)
